EDUCATIONAL AIDS AND CHILDREN'S ITEMS

Kids are always so curious to explore and learn new things. They are constantly interested in the world around them and their active exploring nature is part of growing up.

Parents can help their children grow and understand their surrounding by buying them educational toys.

Educational toys support kids development by increasing their IQ, satisfying their curiosity, helping them learn about the world around them and they are also a great source of fun.

Educational toys have countless benefits and the main one is boosting kids' development.

STORY BOOKS

STORY BOOKS

Stories play a vital role in the growth and development of children. The books they read and the characters they get to know can become like friends.

It's also good for children to understand that books are a useful source of information and that good reading skills are important for success in their future lives.

Reading also helps children with their confidence levels, coping with feelings and language and learning.

Stories are also useful for teaching more complex ideas, such as the importance of sharing, the passage of time, compassion for others.

They can be useful when trying to explain traumatic events, such as family break-ups and bereavement.

PUZZLE SETS AND TOYS

PUZZLE SETS AND TOYS

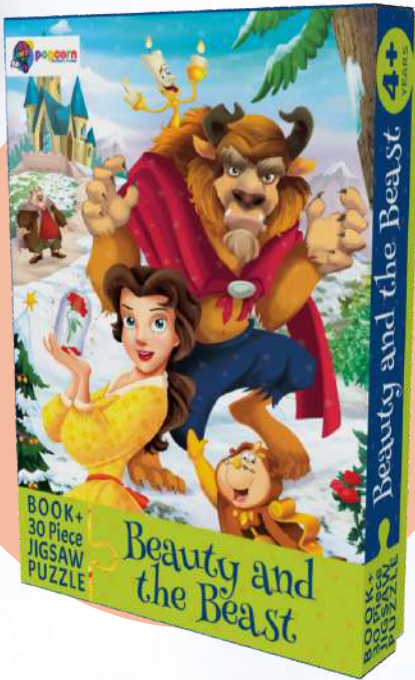

Young children need access to puzzles that are the correct level of difficulty for their current developmental stage to benefit from puzzle play.

They should have access to puzzles that they can do independently. This allows children the chance to build their small muscles, hand-eye coordination, and problem-solving strategies through repeated practice.

They enjoy the feeling of accomplishing a task on their own as they put the puzzles together and take them apart. It is helpful to keep these puzzles in a place where children can access and clean them up independently.

Rotating the selection of puzzles will help maintain their interest.

SMART GAMES AND SMART PUZZLES

SMART GAMES AND SMART PUZZLES

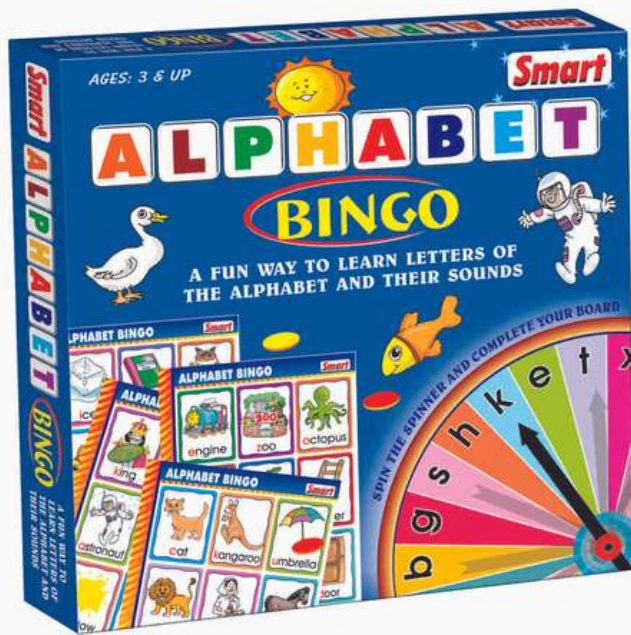

The different designs of educational toys also encourage creativity in children. Some toys that can be manipulated into various shapes and structures teach kids how a variety of things come to being. However, parents must choose appropriate toys for their children depending on their ages. For younger children, colourful toys will arouse their interest, while complex toys such as wooden puzzles can capture the attention of older kids.

Learning through Play is one of the most important concepts in childhood development.

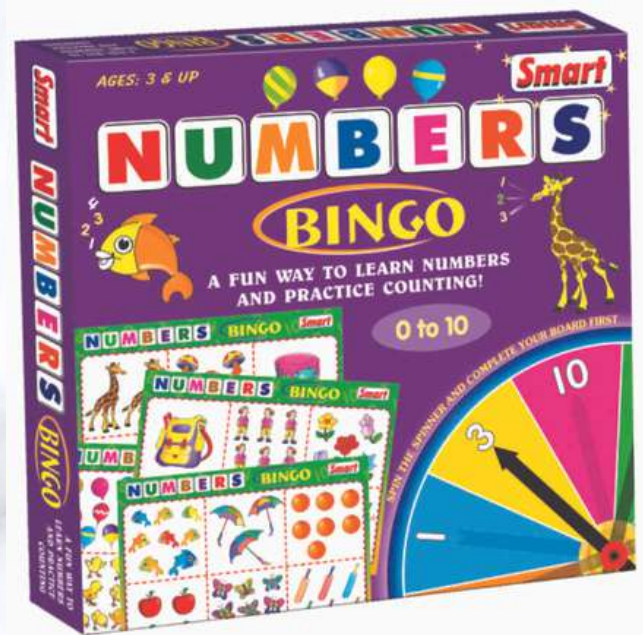

At SmartGames we intent to teach and stimulate cognitive, social and language skills while having fun playing our games.

All SmartGames stimulate various cognitive skills and the most important skills associated with the game are clearly indicated on the packaging.

FLASH CARDS

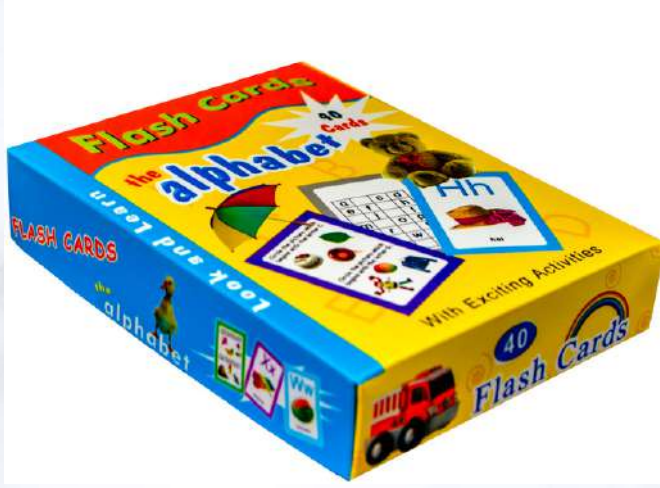

FLASH CARDS

Educational flash cards are an age-old method for improving students' abilities to recall information and understand concepts. There's a reason flash card are just as popular today as they ever were — they do their job, and they do it well. Teachers often use this technique when introducing a new topic, while many students use it as a go-to method when studying for exams and assessments. When helping your children study at home, educational flash cards can become your best friend and favorite tool.

Why Do Flash Cards Work?

When used correctly, flash cards allow students to interact with information in a way that makes it easier to retain. Flash cards are strategically designed to enhance and encourage active recall. The format, usually a question on one side of the card and the answer on the other, requires learners to look at one side and recall the information from the other side.

ACTIVITY BOOKS

ACTIVITY BOOKS

Kid activities books are an effective way of helping with colour, shape, number, and letter recognition.

Children can learn all kinds of essential skills, such as word formation, basic addition and subtraction, and how to obtain various colours by combining different hues.

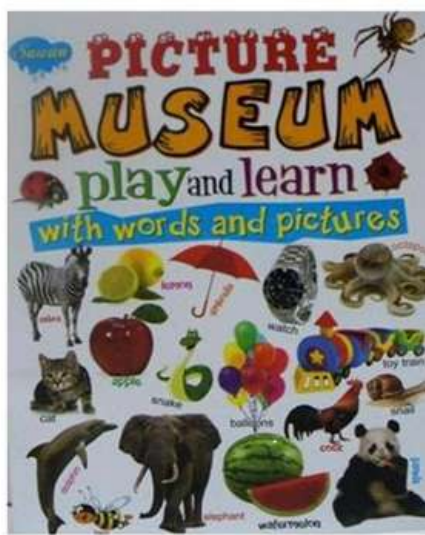

**More Reading & Improved Comprehension Skills.
Reading doesn't have to be boring.**

In fact, by encouraging your children to read with fun activity books you'll be helping them develop good reading habits and superior concentration skills.

Children's activity books help them to develop their reading ability while participating in a range of literacy and critical thinking activities.

Their comprehension skills naturally improve as they puzzle out the different steps to complete an activity.

STATIONERY ITEMS

Stationery is the basic requirement for learning, without it, students are incapable of writing down the notes, drawing as well as taking tests. Stationery is essential for making school projects, assignments.

It is the basic need of any student learning art and crafts, without it, students creativity will be restricted.

Students life is incomplete without stationery, many children are not able to study because they do not have access to basic stationery.

Students should value their stationery items and should not buy fancy stationery available in the market these days as it is only expensive and mechanical but works just fine as the basic stationery and also once the mechanism fails, it is of no use. However, ordinary items are for long term use.
